# LockR

Enterprise Lockscreen Notification

Especially in large scale deployments it necessary to automate all configuration steps, staging as to be as streamlined as possible to keep an eye on costs and eliminate source of errors.

Combined with the demand to push useful information to a business device to either identify a device and/or enhance the usecase.

LockR solve both with an enterprise grade integration as well as the flexibility to customize with your CI.

notification in lockscreen

customize logos and text

enlarge for more details

appconfig via emm/uem

auto launched at device boot

add custom actions

While inventory your devices, add electronical information onto the device without the need to manually label those devices.

LockR best fit for enterprise kiosk use cases, further integrate this feature in LaunchR as a mobile enhancement platform to reorder your cosu design or add more features.

Purpose

identify your android device while locked easily among multiple others and push necessary information to the device lockscreen

Adaptive

customize the design and behavior complete along with your demands, integrate more features to elevate your use case

Easy

no need for manual staging of a device, integrate with android enterprise for app configuration, eliminate failure and reduce cost
